Re: AEN 73-91 - (b) (6)  
Appeal period ending August 14, 1991

Dear Tom:

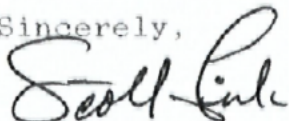

It is our understanding that the above Administrative Exemption has been approved allowing a Caretaker Facility on the (b) (6) property and is now open for comment.

The Colbert Superfund Site Water Sampling Committee recommends that no new wells be constructed in this area because it is known to be at the leading edge of the contaminant plume from the Colbert Landfill. The Committee also has concerns about the close proximity of a new onsite sewage system to the existing monitoring and extraction wells that are located on the property that are a part of the Remedial Action for the Colbert Landfill Superfund Site.

Additionally, the Committee is concerned with the possibility of cross-contamination between aquifers in the contaminated area and with the possibility of additional remediation problems.

Your consideration of these items will be greatly appreciated. If you have any questions please contact me at 456-2474, or (b) (6) at (b) (6).

Sincerely,

Scott Fink, Washington State Dept of Health, member  
Colbert Sampling Committee  
c/o N. 811 Jefferson
